## THE STORY BEHIND

# MAKE IT COUNT

**SINCE 2015** we've been *making it* – from beanies to running hats to screen printed tanks to full button up sets, sky is the limit with our design, sourcing and manufacturing team. We're proud to announce that as of 2022 **we've introduced sustainable, recycled, or eco-friendly options to each of our product categories.**

**OUR DECISIONS** as companies and individuals in the apparel space carry significant weight *and count* – 5-7% of all landfill is clothing that lost its luster. We are committed to not only designing apparel that will be cherished for years but supplying our customers with options that allow them to design branded apparel utilizing sustainable materials.

## WHAT COUNTS IN CUSTOM HATS?

### 1. RECYCLED PLASTIC BILLS

We've introduced recycled plastic bills to every single custom hat we develop. That means bringing a non-biodegradable material back into use rather than living out its days in a landfill.

### 2. HEMP

Hemp is a fascinating plant that has a quick growth period and acts as a natural air purifier. We've introduced it to our custom hat program, coming in six styles and five colors (pg 33).

### 3. 100% ORGANIC COTTON

Organic cotton producers make up less that 1% of all cotton production and put an emphasis on zero pesticide use and superior water management. Our 100% organic cotton can be applied to 10 hat styles and 19 colors (pg 31).
